Spike Two

This model takes some skill and a steady hand. Cut out all pieces and score along the lines where shown. Glue and construct each individual piece by following the order of numbers on the tabs. Glue accordingly. Then begin piecing everything together by joining the letters starting from A onwards. The legs to the left need to be put together before being glued as M. The feet are not glued to the legs. L is attached to the seat and the other foot slides on the end of the right leg. The head and hair create one piece. This is why the hair begins at number 10, following on from the head.

Glue and fold over to other side before gluing any other tabs.
