"RAYNE"

THEGLOOMCREW

1. Cut out the model and each slit, there are typically 10-12 slits. Notice the one above the neck line.
2. Fold arms behind the model's sides, then over the top of each side.
3. Insert horns or hair into the slit that is on the top of the head. Come from underneath the model.
4. Insert chin tab into slit above the neck line.
5. Insert the tabs on either side of the body into slits on the back.
6. Pull hair or ears thru slits on each side of the head.
7. Then insert the four remaining tabs into the two slits on either side of the top of the head, and the two in the back of the head.
